2017 Presenters

The Utah State University Ignite USU talks are now available online at ignite.usu.edu.

The culminating event of USU's Research Week, Ignite USU is similar to TEDxUSU, but highlights the work of students.

Ignite gives eight student researchers the opportunity to share the experiences they have had while involved in undergraduate and graduate research. During their presentations, each student had 5 minutes and 20 auto-advancing slides to present their information.

I am delighted to report that this year students from our college made four of the eight presentations, and they can be now viewed.
